

DR. WILLIAM NICHOLSON—Working for Improved

“I will strive to ensure important pending projects are completed on budget and on time, keeping Washington Hospital financially independent and accountable and ensure that our hospital provides the best care available for you and your loved ones. I believe that state-of-the-art medical care should be available for everyone, in every community. That is the goal I will continue working to reach.”

—Dr. William Nicholson

Since 1998, Dr. William Nicholson has successfully worked to improve the quality of medical service you receive at Washington Hospital. With his strong leadership, our district's success has experienced steady growth.

We have enjoyed both new and expanded medical services and financial stability. Seismic Upgrades, a new Sixth Floor Patient Wing, expanded ER, Child Care Center and Nursing Skills Lab have been completed. We now provide mothers and children immediate around-the-clock care by Pediatric and Obstetric Hospitalists. Other innovative programs include Joint Replacement, Spine Care, Minimally Invasive Surgery and our Lymphedema Clinic.

A new term of service on the Washington Hospital Board will allow Dr. Nicholson to continue improving our health care service.

Re-elect WILLIAM NICHOLSON, M.D. to the Washington
